

Product Information

CX SERIES

Concept: CX Series incorporates CFX's advanced construction features that provide numerous performance advantages to the pianist.

Main features:

Strings

High quality German-made music wire was selected, based on years of experience building and evaluating prototypes and hearing the opinions of performers.

Hammers

German-made hammer felt was finally selected for its superior elasticity and variety of sound it produces.

Soundboard

- The proven design and manufacturing techniques of The CF Series have been adapted for application in the different-sized CX Series.
- Soundboard elements such as the ribs and bridge have been reworked to provide optimal acoustical balance.
- Ribs are affixed in line with the curve of the soundboard to ensure the stability of the crown. (Except C1X, C2X, C3STMI)

Back Posts

- To match improvements in the soundboard, the back posts were also improved.
- The thickness of the back beam, which serves as the primary bulwark against the force of string tension, was increased by 20%. (Except C1X, C2X)

Pedals

- It adopts the same philosophy as that which drove development of The CF Series pedals.
- The structure of the pedals makes them stronger and rigid enough to handle repeated pressing and releasing.

Design

Side Arm

The beautiful flat side arm is the same concept as The CF Series.

Pedal Box

The modern style of the pedal lyre like The CF Series matches the simplicity of the legs.

Frame

The frame features a redesigned model number logo and tuning fork marks.

Legs

Decorative elements on the legs have been eliminated to give the instrument a simple beauty.

Specifications: Please see the attached file.

Promotional materials: Web site (Release date: after September, 26, 2012)
Brochure, Poster (by the end of September, 2012)

Discontinued models: C1M, C2M, C3M, C3STM, C5M, C6M, C7M
